INVENTORY OF DISASTER FIELD STUDIES
IN THE SOCIAL AND BEHAVIORAL SCIENCES
1919-1979*

E. L. Quarantelli

Department of Sociology
Disaster Research Center
The Ohio State University

May 1982

*Some of the more recent work on this volume was partially done under grant PFR-8009036 from the National Science Foundation. However, all views and opinions expressed are those of the Disaster Research Center and not necessarily those of the National Science Foundation.

Acknowledgments

While almost all Disaster Research Center publications involve the work of many members of the Center, this volume is especially a collective product. More than a decade ago, the Center first thought about compiling an inventory of field studies of disasters. Thus, over the years dozens of disaster events were added to a draft inventory although the work was never put into any form for public use and distribution. Only with a project involving the parallel production of an Inventory of the Japanese Disaster Research Literature in the Social and the Behavioral Sciences, was it possible to bring this intended work to fruition.

Various graduate and undergraduate students through the years worked on compiling the information for this inventory. Especially to be singled out for their effort must be Lou Ann Galloway, Carol Smith Jankowski, Beth Rinard, Catherine Smith, and Martha Woodruff. The typing of the final manuscript and the supervision of its production was done in her usual competent manner by Connie Smith.

TABLE OF CONTENTS

Explanation of and Guide to the Inventory	1
Summary Table	6
A-Earthquake	A(1-27)
B-Explosion and Fire	B(1-49)
C-Flood	C(1-90)
D-Hurricane, Typhoon, and Severe Storm	D(1-34)
E-Power System Malfunction	E(1-5)
F-Snowstorm and Blizzard	F(1-14)
G-Tornado	G(1-56)
H-Toxicological Incident	H(1-36)
I-Transportation Accident	I(1-27)
J-Tsunami	J(1-4)
K-Volcanic Eruption	K(1-6)
L-Miscellaneous and Mixed	L(1-13)

Explantion of and Guide to the Inventory

In 1961 the Disaster Research Group of the National Academy of Sciences issued a monograph entitled, Field Studies of Disaster Behavior: An Inventory. That monograph was an attempt to provide in one source "a relatively complete list of the field studies on human behavior in disasters that have been conducted by behavioral scientists" (1961: 1). The list included 114 field studies of 103 events which had produced 121 reports.

In the two decades since that monograph there has been an acceleration in the number of field studies which have been undertaken. This reflects the flourishing of disaster research generally. The Academy inventory therefore is considerably out of date. Annotated bibliographies produced in the ensuing years have not had the same objective as an inventory; a gap in the disaster literature consequently exists. Researchers, planners, and others interested in research findings do not have one source which lists all field studies and identifies and locates pertinent publications for specific disaster situations.

While this report builds on the old Academy inventory, it is not merely an extension of that publication. It differs somewhat in both coverage and format. The end product is a result of a series of decisions we had to make in developing our new inventory. It lists and provides relevant information on disaster field studies in the social and behavioral sciences in English language sources and references for more than a sixty year period. The work on our inventory was accomplished as a part of a larger effort at the Disaster Research Center (DRC) which included the production of a companion volume, Inventory of the Japanese Disaster Research Literature in the Social and Behavioral Sciences.

For background purposes, we will note some of the questions addressed, problems faced, and limitations involved in producing our inventory. An original goal, to produce as complete a listing as possible of all known disaster field studies conducted anywhere by social and behavioral scientists, had to be modified. Certain rationale regarding subject and selection process, time frame, and format are now discussed.

First, for a variety of reasons, but mostly because they have rarely been systematically studied in the field by social and behavioral scientists, very diffuse and slowly developing types of disasters, such as famines, droughts and epidemics were excluded from listing consideration. Emphasis in our inventory is on relatively focalized and sudden types of disasters. While our decision excluded some recent studies and publications, it did not exlude in absolute terms very much of a social scientific nature. Much of the work on famines, for example, is of a historical nature, or deals with the topic from a very practical or operational rather than a social science point of view, as illustrated by the types of articles which appear on the topic of famine in the journal Disasters.

Second, we leave out in this first edition all non-English sources. All Japanese language material is presented in the companion inventory previously mentioned. However, while DRC has in its possession a considerable body of non-English sources (it probably has an almost complete set of empirical writings on disasters in Italian, French, and Swedish), translation problems as well as a known incomplete collection in some languages, led us to non-English references in this inventory.

Third, we include in the inventory only studies undertaken by social and behavioral scientists or done within an explicit social and behavioral science research framework. As such, we have left out of the inventory purely historical studies (e.g., Hilda Grieve, The Great Tide, 1959), as well as personal anecdotal accounts (e.g., as typically written by disaster victims), journalistic descriptions (e.g., Polk Laffoon, Tornado: The Killer Tornado That Blasted Xenia, 1975), and agency after action reports (e.g., Mattie Treadwell, Hurricane Carla, 1961). While some of these publications may be more research useful than some social science works, we were primarily interested in including in the inventory only relatively explicit social scientific contributions to the literature.

Social and behavioral sciences were interpreted as including the fields of anthropology, economics, geography, political science, psychology, sociology, and urban planning. Studies from medicine, psychiatry, social work, and marginal areas relevant to the social sciences were only included in the inventory if what they reported was primarily of a social science nature. Thus, medical studies which focus mostly on health and medical aspects of disasters rather than human and social aspects, were excluded from the inventory.

We also arbitrarily decided to systematically include only studies done up to and through 1979. In actuality some field studies done up to and through 1982 are included. It was not possible within our time constraints to insure total coverage after 1979, but we listed as many field studies as came to attention after that year. If the study by Samuel Prince of the Halifax, Nova Scotia, Canada ship harbor explosion which occurred in 1919 is taken as the first systematic social science field study in the disaster area, as it usually is, our inventory systematically includes all the field work done in the first sixty years of work in the area.

Our listings in the inventory are by the major disaster agent involved. For each listing, the full range of field research on any given disaster event is provided. The specific agent categories used are:

- | | |
|---|-----------------------------|
| A. Earthquakes | G. Tornadoes |
| B. Explosions and fires | H. Toxicological incidents |
| C. Floods | I. Transportation accidents |
| D. Hurricanes, typhoons, and
severe storms | J. Tsunami |
| E. Power system malfunctions | K. Volcanic eruptions |
| F. Snowstorms and blizzards | L. Miscellaneous and mixed |

Again, this aspect of our listing was to a degree arbitrary; the major dimension of the disaster was used for assigning any given event. Thus, a train derailment which led to a dangerous toxic cloud, for example, is listed under toxicological incidents rather than transportation crashes. Explosions and fires, incidentally, are further subdivided into whether they involve building, forest-brush-grass, or other kinds of incidents. Similarly, floods are subdivided: dam, river, flash, or other kinds.

Studies of wartime and military situations, concentration camp behavior, civil disturbances and riots, terrorist activities, and similar conflicts are excluded from the inventory. In this we follow the distinction made in the disaster literature between consensus and dissensus crises and stress situations. We include only consensus kinds of events as disasters, as has become traditional in the disaster literature (for a discussion of the difference between consensus and dissensus types of events see E. L. Quarantelli, "Emergent Accommodation Groups: Beyond Current Collective Behavior Typologies" in Tomatsu Shibutani (ed.), Human Nature and Collective Behavior, 1970). Following a similar logic, field studies of civil defense tests are excluded from the inventory, in contrast to their inclusion along with some wartime studies in the National Academy of Sciences original inventory of Field Studies of Disaster Behavior in 1961.

Specific threat situations, however, resulting from standard disaster agents are included in the inventory as well as actual disaster events. They are included because researchers have found little differences in the two kinds of situations, primarily reflecting a sociological axiom that "if people define a situation as real, it is real insofar as consequences are concerned." On the other hand, none of the numerous studies dealing with disaster preparedness planning are in the inventory since they almost always are not event specific but simply involve discussions of general preparations for a possible disaster. Our interest was only in events with specific time/place parameters.

In our inventory, we otherwise provide a chronological listing of all disaster situations within each of the major disaster agents enumerated above. If an event involved two or more agents, it is listed by the major agent involved which usually but not always is how the event is traditionally identified (e.g., the 1906 San Francisco earthquake rather than fire). No cross-classification of disaster agents is provided.

In our inventory, the following information is provided for each event:

- Major agent involved
- Event name
- Date of occurrence
- Location of event
- A brief narrative on casualties and damages
 - including if there was a federal declaration of disaster for events in the U.S.
- All known reports and publications from study

An event is listed as long as we had information that field work of some kind was undertaken even though no specific report or publication was issued. The undertaking of a field study means that some data were collected even if they still remain specifically unanalyzed. If there are no reports or publications from the study, the name of the organization or the researcher which did the study is included. While no event is listed unless some field work was done, all known reports or publications on that event are provided even if the particular study or data reported did not involve field research. Similarly, studies done long after the disaster event occurred are reported as long as they involved some kind of social science research.

Information provided here is as complete and accurate as we could establish. Some of the material presented, however, has to be approached with a certain amount of caution. For example, as experienced disaster researchers know, casualty figures are estimates at best. The number injured and the amount of property damage can differ by orders of magnitude of two or three depending on which source of information is used. We used those figures which we estimate are the most reliable.

We originally thought of listing the number of interviews obtained in each study, as was done in the original Academy inventory, but eventually rejected the idea because the results could be misleading especially for comparative purposes. For example, almost all interviews by DRC personnel are done face-to-face, involve in-depth probing and often last two to three hours. In contrast, there are studies where the interviews conducted were done over the phone, followed or used a checklist format and lasted no more than five minutes. For certain research purposes, the latter kind of data might be quite valid, but obviously not all interviews obtained in the different studies can be thought of as substantively equivalent.

Reports and publications cited under each event are listed first chronologically and then alphabetically by authors. In the case of non-article references, where known, the number of pages in the text is given. Identical texts which appear in two different sources are normally only listed once; however, somewhat different versions of the same paper or publication are given multiple listings because the additional material or interpretation might be relevant to users of the inventory.

A considerable effort was made to identify all relevant reports and publications. The list (especially before 1980) is probably close to being a complete list of social science references. A major attempt was made to identify writings in other than standard journals and publication outlets, as well as papers presented at major professional meetings. No item was listed in the inventory unless a copy existed in the DRC library or was thought to be available in some other specific location. More than 98 percent of the reports and publications cited were physically seen by the DRC staff who worked on the inventory.

Further editions of this inventory are planned. To allow for the insertion of additional entries in later versions, the pagination of the inventory itself is not consecutive but is alphabetically subdivided by disaster agent. Thus, all earthquake studies are listed on pages numbered A-1, A-2, A-3, etc.; all explosion and fire studies are listed on pages numbered B-1, B-2, B-3, etc.; and so on in each of the major disaster categories from A through L.

Great care has been taken to insure the accuracy of the information presented. Undoubtedly, however, there are errors of omission and commission. Users of this inventory are therefore asked to communicate with DRC upon the discovery of any errors so corrections can be made in future editions.

SUMMARY TABLE

<u>Disaster Agent</u>	<u>Total # of Events Studied in the Field</u>
A. Earthquake	26
B. Explosion and Fire	48
C. Flood	89
D. Hurricane, Typhoon, and Severe Storm	33
E. Power System Malfunction	4
F. Snowstorm and Blizzard	13

A-EARTHQUAKE

AGENT: Earthquake
EVENT: San Francisco Earthquake and Fire
DATE: April 18, 1906
LOCATION: San Francisco, California, USA

DESCRIPTION:

The San Francisco earthquake and fire killed 498 people and injured 415 others. Hundreds of fires burned through the city when gas mains broke. The fires lasted for three days and two nights, covering five square miles of the city. Five hundred city blocks were gutted with 28,000 homes destroyed.

AGENT: Earthquake

EVENT: Earthquake at Hawkes Bay

DATE: September 2, 1931

LOCATION: Hawkes Bay, New Zealand

DESCRIPTION:

230 persons killed in largest earthquake ever to hit the country.

REPORTS AND PUBLICATIONS:

Slade, W. G.

1932 Earthquake psychology. Australian Journal of Psychology and Philosophy 10: 58-63.

Slade, W. G.

AGENT: Earthquake

EVENT: Earthquake in Northern India

DATE: January 15, 1934

LOCATION: Bihar, India

DESCRIPTION:

The earthquake in Northern India killed 9,040 people and injured many. Several North Bihar towns and districts were isolated for three to four days due to the destruction of communication systems.

REPORTS AND PUBLICATIONS:

Prasad, Jamuna

AGENT: Earthquake
EVENT: Earthquake in Southern California
DATE: July 21, 1952
LOCATION: Kern County, California, USA

DESCRIPTION:

The earthquake centered on Tehachapi, California was the state's most violent tremor since the 1906 San Francisco quake. It destroyed or damaged 150 Tehachapi homes and was felt over a 100,000 square mile area. Fourteen persons were killed; 100 were injured. Property damage amounted to \$60 million.

REPORTS AND PUBLICATIONS:

AGENT: Earthquake
EVENT: Bakersfield Earthquake
DATE: August 22, 1952
LOCATION: Bakersfield, California, USA

DESCRIPTION:

The Bakersfield earthquake killed two people and injured 32 others. Property damages were estimated at \$20 million with damages extending over a 98 block area. The central business district sustained the heaviest destruction. The earthquake did not warrant official declaration of disaster.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

AGENT: Earthquake

EVENT: Earthquake in Southern Italy

DATE: August 21, 1962

LOCATION: Avellino, Italy

DESCRIPTION:

The quakes were centered approximately 30 miles northeast of Naples and caused extensive damage to the Southern parts of Italy. The quakes killed a total of 17 people, two people from Avellino. Avellino damages were minimal as compared to those in other areas of Italy.

REPORTS AND PUBLICATIONS:

Moss, Leonard W.

1962 Terremoto, 1962. Unpublished rough draft of report. 9 pp.

AGENT: Earthquake

EVENT: Alaskan Earthquake

DATE: March 27, 1964

LOCATION: Anchorage and coastal villages, Alaska, USA

DESCRIPTION:

The Alaskan earthquake registered a magnitude of 8.4-8.6 on the Richter scale and lasted 3 to 4 minutes, affecting 50,000 square miles. The earthquake generated tsunami which were felt by the Alaskan coastal villages, and landslides which caused major damage in Anchorage. The quake killed 116 people in the state, with property damage estimated at \$300 million. In Anchorage, hundreds of homes were destroyed as well as much of the central business district. Parts of Alaska were officially declared disaster areas and the state received \$57 million in federal funding.

AGENT: Earthquake
EVENT: Niigata Earthquake
DATE: June 16, 1964
LOCATION: Niigata, Japan

DESCRIPTION:

In Niigata, the combination of earthquake and the Shinano River overflow killed 13 persons and injured 315 others. Property damages were estimated at \$26 billion yen, with 3,640 buildings destroyed and approximately 27,000 others severely damaged. Communication and transportation facilities into and out of the city were badly damaged.

AGENT: Earthquake

EVENT: Earthquake in Northern Chile

DATE: March 28, 1965

LOCATION: Northern Areas, Chile

DESCRIPTION:

The Chile earthquake occurred near Santiago and was felt in most of the northern half of the country. Property damage was estimated to be between \$50-100 million. The earthquake left 18,000 people homeless and killed 394 people.

REPORTS AND PUBLICATIONS:

AGENT: Earthquake

EVENT: Earthquake in Central Greece

DATE: April 5, 1965

LOCATION: Megalopolis, Central Area, Greece

DESCRIPTION:

The earthquake in Central Greece killed 33 people and injured over 200 others, totally destroying 1,700 homes and damaging 7,000 more. The earthquake left 25,000 people homeless.

REPORTS AND PUBLICATIONS:

1965 The Earthquake in Greece. Research Memo #19. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 2 pp.

AGENT: Earthquake

EVENT: Earthquake in El Salvador

DATE: May 3, 1965

LOCATION: San Salvador, El Salvador

DESCRIPTION:

The San Salvador earthquake killed 150 people and injured 500 others. An estimated 40,000 people were left homeless. Property damage has not been estimated.

REPORTS AND PUBLICATIONS:

1965 Earthquake Disaster in San Salvador, El Salvador. Research Memo #21. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 3 pp.

AGENT: Earthquake

EVENT: Matsushiro Earthquake

DATE: August 3, 1965 to 1966

LOCATION: Matsushiro, Nagano, Japan

DESCRIPTION:

For more than a year Matsushiro experienced 462,781 quakes; thousands of which could be felt. As a result of the frequency of quakes, tourist trade suffered.

REPORTS AND PUBLICATIONS:

AGENT: Earthquake

EVENT: Sicilian Earthquake

DATE: January 14 - February 5, 1968

LOCATION: Western Sicily, Italy

DESCRIPTION:

A series of relatively moderate shocks of magnitudes 4.1 to 5.4 occurred at least 17 separate times in a 23 day period. Much physical damage was done with some villages all but completely destroyed. There were 260 known deaths directly attributable to the three most destructive earthquakes. At least 600 were injured, and an estimated 60,000 to 80,000 persons were made homeless when 18,000 dwelling units were destroyed or severely damaged.

AGENT: Earthquake
EVENT: Gediz Earthquake
DATE: March 28, 1970
LOCATION: Gediz, Turkey

DESCRIPTION:

A major earthquake of Richter magnitude 7.1 occurred in western Turkey, killing 1,086 persons, injuring 1,200 and causing \$23 million in property loss. 9,528 dwellings were destroyed or heavily damaged; parts of Gediz were totally destroyed. All of the city was without water for several days. Structural damage occurred, due to the main shock and fires started with after-shocks short-circuited powerlines.

AGENT: Explosion

EVENT: Fireworks Plant Explosion

DATE: June 5, 1953

LOCATION: Houston, Texas, USA

DESCRIPTION:

An explosion in a fireworks plant killed four and injured 96 as well as deamaging 30 homes in the neighborhood.

REPORTS AND PUBLICATIONS:

Killian, Lewis

1956 A Study of Response to the Houston, Texas Fireworks Explosion.
Washington, D. C.: Committee on Disaster Studies, National
Academy of Sciences. 25 pp.

AGENT: Explosions and Fire
EVENT: West Frankfort Mine Explosion
DATE: December 21, 1951
LOCATION: West Frankfort, Illinois, USA

DESCRIPTION:

The West Frankfort mine explosion killed 120 of the 218 men working the shift.

REPORTS AND PUBLICATIONS:

Gordon, Archer S. and Frank Raymon

1952 Report of the mine explosion disaster. Medical Laboratories
Special Report #12. Maryland: Army Chemical Center. 12 pp.

Gordon, Archer S. and Frank Raymon

21, 1951. Pp. 59-75 in E. S. Marks, C. E. Fritz et al., Human
Reactions in Disaster Situations, Volume 3. Unpublished manu-
script. Chicago, Illinois: National Opinion Research Center.

AGENT: Explosion

EVENT: Ship Explosion and Fires

DATE: May 26, 1954

LOCATION: U.S.S. Bennington, USA

DESCRIPTION:

An explosion and fire aboard the U.S. aircraft carrier Bennington killed 102 persons and injured 203.

REPORTS AND PUBLICATIONS:

Committee on Disaster Studies, 1954

AGENT: Explosion
EVENT: Fireworks Plant Explosion
DATE: July 16, 1954
LOCATION: Chestertown, Maryland, USA

DESCRIPTION:

Eleven persons were killed during a series of explosions which occurred during a two-hour interval. Fire, in addition to the explosions, demolished 35 of the plant's 60 buildings. Scores of townspeople were injured by flying debris.

REPORTS AND PUBLICATIONS:

Rayner, Jeanette F.

1954 Suggestion for research in Chestertown disaster. Unpublished manuscript. Washington, D. C.: Committee on Disaster Studies, National Academy of Sciences. 12 pp.

AGENT: Fire - Building
EVENT: Arundel Park Hall Fire
DATE: January 29, 1956
LOCATION: Brooklyn, Maryland, USA

DESCRIPTION:

The Arundel Park Hall fire killed 11 persons and injured about 250 others. The hall had been rented for a church function and contained from 1,100 to 1,200 persons.

REPORTS AND PUBLICATIONS:

Bryan, John L.

1957 A Study of the Survivors: Reports on the Panic in the Fire at the Arundel Park Hall in Brooklyn, Maryland on January 29, 1956. College Park: Fire Protection Curriculum, University of Maryland. 11 pp.

Bryan, John L.

1958 Psychology of panic. Paper presented at the 30th annual Fire Department Instructors Conference, Memphis, Tennessee, February 18-21, 1958.

AGENT: Explosion and Fire
EVENT: Springhill Mine Explosion
DATE: November 1, 1956
LOCATION: SpringHill, Nova Scotia, Canada

DESCRIPTION:

The Springhill mine explosion and fire trapped and killed 36 men. Three bodies were removed from the debris and the remaining 88 men were rescued on November 5.

REPORTS AND PUBLICATIONS:

Weil, R. J. and F. A. Dunsworth
1958 Psychiatric aspects of disasters - a case history - some experiences during the Springhill, Nova Scotia mining disaster. Canadian Psychiatric Association Journal 3: 11-17.

AGENT: Explosions and Fire

EVENT: Gasoline Tanker Explosion

DATE: March 7, 1957

LOCATION: Delaware River near Newcastle, Delaware, USA

DESCRIPTION:

A gasoline tanker collided with a freighter, resulting in a series of explosions, killing 10 people and injuring several more.

REPORTS AND PUBLICATIONS:

Leopold, R. L. and Harold Dillon

1963 Psycho-anatomy of a disaster: a long term study of post-traumatic neuroses in survivors of a marine explosion. American Journal of Psychiatry 119: 913-921.

AGENT: Explosion
EVENT: Roseburg Explosion
DATE: August 7, 1959
LOCATION: Roseburg, Oregon, USA

DESCRIPTION:

An explosion in Roseburg killed 13 people and injured 125 others. Property damages were estimated at \$12 million, as the explosion leveled seven city blocks and damaged 28 others.

REPORTS AND PUBLICATIONS:

Greene, Mark R.

1963 Risk management in a catastrophe. Eugene, Oregon: Small Business Study, University of Oregon. 27 pp.

Greene, Mark R.

AGENT: Explosion and Fire

EVENT: Tanker Ship Fire

DATE: November 8, 1959

LOCATION: Houston, Texas, USA

DESCRIPTION:

Eight persons were killed when a fire started aboard the American Oil Company tanker ship, Amoco Virginia, as petroleum products were being loaded. Explosions followed immediately and spread the flames.

REPORTS AND PUBLICATIONS:

Moore, Harry E.

1959 Houston channel ship fire. Unpublished report. Austin, Texas: Department of Sociology, University of Texas. 19 pp.

AGENT: Explosion
EVENT: Coliseum Explosion
DATE: October 31, 1963
LOCATION: Indianapolis, Indiana, USA

DESCRIPTION:

An explosion occurred in the state fairgrounds coliseum during a "Holiday on Ice" performance, killing 81 persons and injuring more than 400 others. The initial explosion was followed by a second explosion of lesser intensity and a small fire. Aside from burns, casualties resulted from uprooted chunks of concrete. There was no official declaration of disaster.

REPORTS AND PUBLICATIONS:

AGENT: Fire - Building
EVENT: Nursing Home Fire
DATE: November 23, 1963
LOCATION: Fitchville, Ohio, USA

DESCRIPTION:

The Golden Age Nursing Home burned to the ground killing 63 of the 84 patients.

REPORTS AND PUBLICATIONS:

Anderson, William and E. L. Quarantelli

1964 A Description of Organizational Activities in the Fitchville, Ohio Nursing Home Fire. Research Note #8. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 17 pp.

AGENT: Explosion
EVENT: Explosion in Chemical Plant
DATE: January 12, 1964
LOCATION: Attleboro, Massachusetts, USA
DESCRIPTION:

Toxic smoke from an explosion in the Thompson Chemical Plant caused the deaths of seven persons and injured 40 persons. Residents within a one-mile radius of the plant were evacuated due to threat of further explosions. Property damage was estimated at over \$3 million.

REPORTS AND PUBLICATIONS:

Yutzy, Daniel

AGENT: Fire - Building

EVENT: Fire in the Cabaret Playtown in Tokyo

DATE: March 13, 1967

LOCATION: Tokyo, Japan

DESCRIPTION:

A nightclub fire killed 118 persons, 22 of them as a result of jumping from the building. There were only 61 survivors in the nightclub which was on the seventh floor of a department store. The fire never reached the club; victims died from carbon monoxide poisoning or a result of jumping.

REPORTS AND PUBLICATIONS:

Abe, Kitao

1976 The behavior of survivors and victims in a Japanese nightclub fire. Mass Emergencies 1: 119-124.

AGENT: Explosion

EVENT: Store Explosion Resulting in Fires

DATE: April 6, 1968

LOCATION: Richmond, Indiana, USA

DESCRIPTION:

An explosion in a sporting goods store resulted in a fire which encompassed two city blocks of the downtown Richmond business district. The fire killed 41 and injured over 100 persons.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1968

AGENT: Explosion

EVENT: Lima Oil Pipeline Explosion

DATE: January 13, 1969

LOCATION: Lima, Ohio, USA

DESCRIPTION:

An oil pipeline explosion forced 6,000 residents to evacuate their homes as small fires developed; however, these were quickly extinguished. Property damage was estimated at \$185,000.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Explosion

EVENT: Railway Tank Car Explosion

DATE: January 25, 1969

LOCATION: Laurel, Mississippi, USA

DESCRIPTION:

Railway tank cars exploded killing two persons and injuring 35. Property damage was estimated at over \$3 million; 54 residences were destroyed.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Fire - Brush

EVENT: Brush Fire in Southern California

DATE: October 1, 1970

LOCATION: Southern California, USA

DESCRIPTION:

A series of brush fires in Southern California killed 13 persons and injured over 350 others. Property damage was estimated at \$200 million. Parts of Southern California were officially declared disaster areas and received \$16 million in federal funding.

REPORTS AND PUBLICATIONS:

Forrest, Thomas Robert

AGENT: Fire - Building
EVENT: Great Chelsea Conflagration
DATE: October 14, 1973
LOCATION: Chelsea, Massachusetts, USA

DESCRIPTION:

This fire in Chelsea destroyed 18 city blocks, damaged 12 others and left property damage figures in the millions. No casualties resulted, however, five firemen were injured while trying to control the blaze. With official declaration of disaster, \$1.5 million in federal funding was allocated.

REPORTS AND PUBLICATIONS:

Blanshan, Sue and Marvin Hershiser
1973 Some Observations on Fire Departments' Response to a Massive Fire in Chelsea, Massachusetts, October 14, 1973. Working Paper #56. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 5 pp.

AGENT: Fire - Forest Fire
EVENT: Chatauqua Fire
DATE: January 1975
LOCATION: Chatauqua (pseudonym), Ohio, USA

DESCRIPTION:

A blaze on a mountainside combined with winds ranging up to 130 miles per hour to threaten the community of Chatauqua. The residents were forced to evacuate when firefighters believed the blaze to be uncontrollable. The winds shifted and died down, however, the fire was extinguished. There were no casualties and damage was minimal.

REPORTS AND PUBLICATIONS:

Wolf, Charlotte

1975 Group perspective formation and strategies of identity in a post threat situation. Sociological Quarterly 16: 401-414.

AGENT: Explosion
EVENT: North Bay Explosion
DATE: January 8, 1975
LOCATION: North Bay, Ontario, Canada

DESCRIPTION:

The Barry Building of North Bay exploded at 3:30, killing 8 people and injuring 39. The two story office building reeked of gas throughout the day and occupants of the building as well as passersby commented on the smell, however, no official action was taken.

REPORTS AND PUBLICATIONS:

- Scanlon, Joseph and Brian Taylor

AGENT: Explosion
EVENT: Alberta TNT Explosion
DATE: April 21, 1975
LOCATION: Alberta, Canada

DESCRIPTION:

The accidental detonation of 3,000 pounds of nitroglycerine-based explosives claimed the lives of six men; three persons were seriously injured. Homes over a mile away were shaken by the blast and showering debris.

REPORTS AND PUBLICATIONS:

Ponting, J. Rick

1976 Human behavioral reactions to an accidental explosion: a test of a sociological theory of panic. Alberta, Canada: Department of Sociology, The University of Calgary. 78 pp.

AGENT: Explosion

EVENT: Chlorine Gas Explosion in Tank Car

DATE: December 14, 1975

LOCATION: Niagara Falls, New York, USA

DESCRIPTION:

Explosion of a tanker car containing chlorine gas released toxic fumes which killed six persons and injured 87. Property damage was primarily contained within the Hooker Chemical Plant, the location of the explosion.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Explosion

EVENT: LaGuardia Airport Bombing

DATE: December 29, 1975

LOCATION: Queens, New York, USA

DESCRIPTION:

A bomb explosion in the TWA baggage claim area at the LaGuardia airport terminal killed 11 persons and injured 60 others.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Explosion

EVENT: Gas Explosion in Hotel

DATE: January 10, 1976

LOCATION: Fremont, Nebraska, USA

DESCRIPTION:

A gas leak was the apparent cause of the explosion that ripped through the first and second floors of the Pathfinder Hotel, killing 20 persons and injuring 41.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Fire - Building
EVENT: Fire in Nursing Home
DATE: January 30, 1976
LOCATION: Chicago, Illinois, USA

DESCRIPTION:

A one room fire in the Winecrest Nursing and Rest Home created dense smoke that killed 13 persons and injured 32 others. All resident victims of the fire suffered from smoke inhalation.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Fire - Building
EVENT: Fort Garry Court Apartment Fire
DATE: February 2, 1976
LOCATION: Winnipeg, Manitoba, Canada

DESCRIPTION:

Five people died and two were injured as a result of the fire which devastated the Ft. Garry apartment complex. Many lost their possessions in the fire. Huge amounts of water used to fight the fire left their mark, as frigid weather conditions coated the building and rubble with ice.

REPORTS AND PUBLICATIONS:

Scanlon, Joseph and David Tait

findings. Fire Journal 73: 76-79, 122-123.

AGENT: Explosion and Fire
EVENT: Ammonia Tanker Explosion
DATE: May 11, 1976
LOCATION: Houston, Texas, USA

DESCRIPTION:

A tanker carrying liquid ammonia killed 5 people when it exploded after crashing off an overpass onto a freeway. Two hundred people were overcome by the resulting toxic fumes.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Fire - Building

EVENT: The Great Sakata Fire

DATE: October 29, 1976

LOCATION: Nakamachi and Nibancho, Japan

DESCRIPTION:

A fire in a movie house spread to a department store and eventually burned 1,017 houses. While there was only one death, 746 people were injured.

REPORTS AND PUBLICATIONS:

Abe, Kitao

1976 The Psychological Analysis of the Evacuating Behavior at the Great Sakata fire. 36 pp.

AGENT: Explosion and Fire

EVENT: Queens Explosion

DATE: November 21, 1976

LOCATION: Queens, New York, USA

DESCRIPTION:

An explosion at the Warner-Lambert Company killed one person and injured 55 others.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Fire - Building

EVENT: Goulds Fire

DATE: December 26, 1976

LOCATION: Goulds, Newfoundland, Canada

DESCRIPTION:

A fire in a Goulds nursing home killed 21 persons.

REPORTS AND PUBLICATIONS:

Scanlon, Joseph with Darlene Harapiak and Mary Lou Tsario
1977 The Goulds fire emergency communications in Newfoundland.
Ottawa, Canada: Emergency Planning Canada. 28 pp.

AGENT: Fire - Building
EVENT: Beverly Hills Nightclub Fire
DATE: May 28, 1977
LOCATION: Southgate, Kentucky, USA

DESCRIPTION:

A fire in the Beverly Hills Supper Club killed 164 people and injured 100 others. Toxic fumes were responsible for the majority of deaths and injuries. The nightclub was completely destroyed with an estimated \$2 million in damages.

REPORTS AND PUBLICATIONS:

AGENT: Flood - River

EVENT: Kansas-Missouri Floods

DATE: July 10-14, 1951

LOCATION: Eastern Kansas and Western Missouri, USA

DESCRIPTION:

The Kansas-Missouri floods were a result of heavy rains that developed into a major disaster when the Kansas River crested on July 13. The floods killed 41 people and caused extensive property damage in Manhattan, Topeka, and Lawrence, Kansas. Kansas City's stockyards and industrial lowlands were inundated. Property damages were estimated at \$750 million to \$1 billion. Parts of Kansas and Missouri were officially declared disaster areas and received \$17 million in federal funding.

AGENT: Flood - River
EVENT: Rio Grande River Flood in the U.S.
DATE: June 27-30, 1954
LOCATION: Eagle Pass, Texas, USA

DESCRIPTION:

In Eagle Pass, 360 people were injured, 55 buildings destroyed and another 325 damaged when the Rio Grande River inundated 55 percent of the town. There were no casualties in the community. However, the flood involved much of the southwestern parts of Texas and parts of Mexico where loss of life and property damages were greater. Parts of the state of Texas were officially declared disaster areas and Texas received \$877,500 in federal funding.

AGENT: Flood - River
EVENT: Farmington Flood
DATE: August 18, 1955
LOCATION: Farmington, Connecticut, USA
DESCRIPTION:

In Connecticut, 6,000 persons were evacuated, 691 homes were destroyed and 10,455 were damaged as a result of flooding. The flooding was due to 14 inches of rainfall within a period of 36 hours. In Farmington, over 300 families were evacuated, 130 homes were destroyed and 240 were damaged. Parts of the state of Connecticut were officially declared disaster areas and received \$1 million in federal funding.

REPORTS AND PUBLICATIONS:

Klausner, Samuel Z. and Harry V. Kincaid
1956 Social Problems of Sheltering Flood Evacuees. New York:
Bureau of Applied Social Research, Columbia University. 175 pp.

AGENT: Flood - Dam
EVENT: Port Jervis False Dam Burst Report
DATE: August 19, 1955
LOCATION: Port Jervis, New York, USA

DESCRIPTION:

Officials estimated that between 2,500 and 3,000 persons evacuated as a result of a false report of a dam burst. No casualties or destruction occurred, and Port Jervis was not officially declared a disaster area.

REPORTS AND PUBLICATIONS:

Danzig, E. R., P. W. Thayer, and Lila R. Galanter

AGENT: Flood - Other
EVENT: Tampico Hurricane Floods
DATE: September 30, 1955
LOCATION: Tampico, Mexico

DESCRIPTION:

Three hurricanes hit Tampico in September, killing 3,000 people and injuring many others. The first occurred on the fourth and caused the evacuation of thousands of persons from the lower parts of the city. The second occurred on the 19th of September, and struck the city directly, crippling it for several days. The third occurred on September 30. Although it did not hit the city directly, massive flooding completely isolated Tampico from the rest of the nation. Approximately 60,000 of the 114,000 inhabitants were left homeless, with 4,800 homes destroyed and 6,500 severely damaged.

REPORTS AND PUBLICATIONS:

DeHoyos, Arturo

1956 The Tampico Disaster. Washington, D. C.: Committee on Disaster Studies, National Academy of Sciences. 34 pp.

AGENT: Flood - Dam
EVENT: Norwalk Flood
DATE: October 15-16, 1955
LOCATION: Norwalk, Connecticut, USA

DESCRIPTION:

In Norwalk, a succession of dams collapsed after a heavy rainfall of 13 inches. The flooding resulted in four deaths and extensively damaged parts of Connecticut, with losses estimated at \$8 million. Parts of the state were previously under federal declaration of disaster due to a hurricane and torrential rains and floods in August. The state received \$1 million in federal funding.

AGENT: Flood - River

EVENT: Northern California Floods

DATE: December 21, 1964

LOCATION: Northern California, USA

DESCRIPTION:

Throughout California, Oregon, Washington, and Idaho; 45 people were killed and 2,000 injured. The property damage amounted to \$1 billion. With official declaration of disaster, \$56.7 million in federal funding was allotted to the four states. Northern California was most affected and received \$37.6 million.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1964

AGENT: Flood - Flash

EVENT: Trinity River Flash Flood

DATE: Winter, 1964-1965

LOCATION: Hupa Reservation, Northwestern California, USA

DESCRIPTION:

Flash flooding of lowland areas on the Hupa Indian Reservation resulted in no casualties or injuries. Minimal property damage and highway washouts occurred. Official declaration of disaster was not warranted.

REPORTS AND PUBLICATIONS:

Bushnell, John H.

1969 Hupa reaction to the Trinity River floods: post-hoc recourse to aboriginal belief. Anthropological Quarterly 42: 316-324.

AGENT: Flood - River
EVENT: Mankato Flood
DATE: April 9, 1965
LOCATION: Mankato, Minnesota, USA

DESCRIPTION:

Many North Central Plain states were involved in a series of floods and tornadoes that killed 31 persons and injured 1,269. Damages were extensive, with the destruction of 388 dwellings and another 2,828 damaged. In Mankato 7,500 persons were forced to evacuate when the Mississippi River crested at 29.07 feet above flood stage. Estimated damages for the community were \$5.5 million. Parts of Minnesota were officially declared disaster areas and received \$9,588,776 in federal funding.

REPORTS AND PUBLICATIONS:

Parr, Arnold

1969 Observations Concerning the Southern Manitoba Spring Flood Preparations, 1969. Research Report #23. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 8 pp.

AGENT: Flood - River
EVENT: Threat of St. Paul Flood
DATE: April 10, 1969
LOCATION: St. Paul, Minnesota, USA

DESCRIPTION:

In St. Paul, it was predicted that the crests of the Mississippi and Minnesota Rivers would meet; consequently, flooding was expected to occur. Precautionary measures were taken, such as sandbagging, flood wall extensions and evacuation of some towns. However, no flooding occurred. Official declaration of disaster was not warranted.

AGENT: Flood - River
EVENT: Iowa Flood
DATE: April 11, 1969
LOCATION: Sioux City, Iowa, USA

DESCRIPTION:

No casualties and minimal property damage occurred when the Big Sioux River crested at 11.7 feet above flood stage. During the emergency period, 41 families were forced to evacuate; however, the dikes held and little flooding occurred. Sioux City was not officially declared a disaster area.

AGENT: Flood - River
EVENT: South Dakota Flood
DATE: April 12, 1969
LOCATION: Sioux Falls, South Dakota, USA
DESCRIPTION:

No casualties and minimal property damage occurred when the Big Sioux River crested at 19.73 feet above flood stage. During the emergency period, 50 families were forced to evacuate; however, the dikes held, and little flooding occurred. Sioux Falls was not officially declared a disaster area.

1969 The 1969 Spring Floods. Research Memo #35. Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Flood - Other

EVENT: July 5 Flooding

DATE: July 5, 1969

LOCATION: Ashland, Ohio, USA

DESCRIPTION:

No casualties occurred in Ashland; however, property damage amounted to \$1.9 million. Official declaration of disaster for the state of Ohio resulted in an allotment of \$6 million in federal funding. Many northern Ohio communities were damaged by the floods resulting from area storms.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Flood - Other

EVENT: July 5 Flooding

DATE: July 5, 1969

LOCATION: Norwalk, Ohio, USA

DESCRIPTION:

No casualties occurred in Norwalk; however, property damage amounted to \$857,000. With official declaration of disaster, \$6 million in federal funding was allotted to the state of Ohio. Many northern Ohio communities were damaged by the floods resulting from area storms.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Flood - Other

EVENT: July 5 Flooding

DATE: July 5, 1969

LOCATION: Wooster, Ohio, USA

DESCRIPTION:

As a result of storms, there were floods in many Northern Ohio communities. In Wooster, 11 people were killed and a few were injured. Official declaration of disaster throughout parts of the state of Ohio resulted in federal funding of \$6.1 million.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Flood - River

EVENT: Southeast Pennsylvania Floods

DATE: September 16, 1971

LOCATION: Chester, Pennsylvania, USA

DESCRIPTION:

Twelve persons died and 450 were left homeless when Chester Creek overflowed as a result of flooding in Southeast Pennsylvania. Property damage amounted to \$17 million, and with official declaration of disaster, the state received \$500,000 in federal funding.

AGENT: Flood - Dam
EVENT: Buffalo Creek Flood
DATE: February 26, 1972
LOCATION: Buffalo Creek, West Virginia, USA

DESCRIPTION:

The Buffalo Mining Company, Dam Three, collapsed as a result of heavy rains and flooded an 18 mile strip of the Buffalo Creek Valley. Fourteen mining communities were flooded, 124 people were killed, and 1,100 were injured. Property damage was estimated at \$50 million: 546 homes were destroyed and another 538 were damaged. Of 5,000 area residents, 4,000 were left homeless. Parts of the state of West Virginia were officially declared disaster areas and received \$6 million in federal funding.

AGENT: Flood - Dam
EVENT: Rapid City Flood
DATE: June 9, 1972
LOCATION: Rapid City, South Dakota, USA

DESCRIPTION:

Heavy rains in the Black Hills initially caused flooding in Rapid City; however, a second wave of destruction came when Canyon Lake Dam collapsed under the pressure of one foot of rain, sprawling water into Rapid Creek. Damage was extensive along a 30 mile long, half a mile wide area. 237 persons were killed and 5,000 persons were left homeless. Property damage was estimated at \$100 million. Parts of the state of South Dakota were officially declared disaster areas and received \$23 million in federal funding.

AGENT: Flood - River
EVENT: Richmond Flood
DATE: June 22, 1972
LOCATION: Richmond, Virginia, USA

DESCRIPTION:

In Virginia, floods affected 2/3 of the state, causing \$160 million in property damage and 17 deaths. The James River overflowed, inundating 1/6 of the city of Richmond and triggering an evacuation of 200 blocks of the commercial-business district of the downtown area, however, no casualties resulted in the city. Flooding of the city's water-works caused an urgent problem due to lack of drinking water. Parts of the state of Virginia were officially declared disaster areas and received \$20.2 million in federal funding.

AGENT: Flood - River

EVENT: Floods from Tropical Storm Agnes

DATE: June 25, 1972

LOCATION: Lebanon, Pennsylvania, USA

DESCRIPTION:

Heavy rains from Hurricane Agnes resulted in flooding, causing hundreds to evacuate their homes. No casualties resulted; however, 50 homes were destroyed. Parts of Pennsylvania were officially declared disaster areas and received \$356,928,822 in federal funding.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1972

AGENT: Flood - River

EVENT: Floods from Tropical Storm Agnes

DATE: June 26, 1972

LOCATION: Wilkes-Barre and the Wyoming Valley, Pennsylvania, USA

DESCRIPTION:

The rains of Hurricane Agnes caused flooding across six states (New York, New Jersey, Pennsylvania, West Virginia, Virginia, and Maryland), resulting in nearly \$2 billion in property damages. In Wilkes-Barre, these heavy rains which resulted in flooding throughout the Wyoming Valley killed four persons, left 30,000 homeless, and caused over \$1 billion in property damages. Parts of Pennsylvania were officially declared disaster areas and received \$356 million in federal funding.

AGENT: Flood - River
EVENT: Idaho Flood
DATE: January 1974
LOCATION: Silver Valley, Northern Idaho, USA

DESCRIPTION:

Overflow of the Coeur d'Alene River caused the evacuation of nearly 800 families in Silver Valley. Few injuries resulted, and damages were minimal. Silver Valley was not officially declared a disaster area.

AGENT: Flood - River

EVENT: Threat of Missouri Flood

DATE: February 27, 1974

LOCATION: Missouri, USA

DESCRIPTION:

Missouri communities along the Mississippi River were threatened by flood; however, the river did not overflow.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1974

AGENT: Flood - River

EVENT: Threat of Mississippi River Flood

DATE: February 25, 1974

LOCATION: Arkansas, USA

DESCRIPTION:

Arkansas communities along the Mississippi River were threatened by flood which did not occur.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1974

AGENT: Flood - River

EVENT: Mississippi River Flood

DATE: March 1, 1974

LOCATION: Vicksburg, Mississippi, USA

DESCRIPTION:

Mississippi communities along the Mississippi River were threatened by flood; however, the river did not overflow.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1974

AGENT: Flood - River
EVENT: Manitoba Flood
DATE: April 21, 1974
LOCATION: Winnipeg, Manitoba, Canada
DESCRIPTION:

In Winnipeg, preparatory measures were taken to evacuate several hundred persons when the rivers of the Red River Valley Basin approached cresting levels. There were no casualties, however, highways were blocked or washing away and hundreds of homes were flooded.

REPORTS AND PUBLICATIONS:

Hannigan, John A. and Rodney M. Kueneman

AGENT: Flood - River

EVENT: Queensland Flood

DATE: February 11, 1976

LOCATION: Beaudesert, Queensland, Australia

DESCRIPTION:

No casualties resulted from the Queensland flood which occurred in the lower Logan River, however, area residents were evacuated. Between 50 and 100 homes were flooded.

REPORTS AND PUBLICATIONS:

Irish, J. L. and B. Falconer

1976 Reaction to flood warning. Paper presented at the Symposium on Natural Hazards in Canberra, Australia, May 26-29, 1976. 29 pp.

AGENT: Flood - River

EVENT: Minot Flood

DATE: April 15, 1976

LOCATION: Minot, North Dakota, USA

DESCRIPTION:

Approximately 12,000 people were evacuated when the Souris River flooded for the fifth time in seven years.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1976

AGENT: Flood - Dam
EVENT: Teton Dam Flood
DATE: June 5, 1976
LOCATION: Southeastern Idaho, USA
DESCRIPTION:

The dam began leaking three and one-half hours before it burst, giving the surrounding communities little warning of the impending event. The break released 80 billion gallons of water along an 80 mile path, killing 11 people, hospitalizing 13 others, and causing \$1 billion in property losses. Approximately 80,000 people were forced to evacuate their homes in four counties. The aftermath left 40,000 people homeless and completely inundated 300 square miles of farm land. Aerial surveys indicated that 450 farms, 700 homes, and 200 businesses were damaged or destroyed. Parts of Idaho were officially declared disaster areas and received \$44 million in federal funding.

AGENT: Flood - Flash
EVENT: Big Thompson Flood
DATE: July 31, 1976
LOCATION: Loveland, Colorado, USA

DESCRIPTION:

The 25 mile long Big Thompson Canyon experienced extensive flooding, killing 139 people and injuring 88 others. Rain fell on the canyon for four and a half hours, causing the river to crest 10-18 feet above normal. In the days following the initial rainfall, 25.8 million gallons of water poured into the canyon daily, resulting in the evacuation of 1,900-2,600 people. Parts of Colorado were officially declared disaster areas and received \$8 million in federal funding.

AGENT: Flood - River

EVENT: Charleston Flood

DATE: January 17, 1977

LOCATION: Charleston, Missouri, USA

DESCRIPTION:

Flooding in Charleston was minimal with loss limited to property and crop damage.

REPORTS AND PUBLICATIONS:

1977 Flood Rural MH Services. Field Report #41. Columbus, Ohio:
The Disaster Research Center, The Ohio State University.

AGENT: Flood - River

EVENT: Harlan Flood

DATE: April 6, 1977

LOCATION: Harlan County, Kentucky, USA

DESCRIPTION:

Heavy rains caused widespread, severe flooding in several Southeastern Kentucky and Southwestern Virginia communities. In Harlan, Kentucky, five people were killed, 20 were injured, and 2,500 people were evacuated as a result of the floods. Seventy percent of the businesses in Harlan were inundated. Property damages in Eastern Kentucky were estimated at \$100 million. Parts of Kentucky were officially declared disaster areas and received \$28 million in federal funding.

REPORTS AND PUBLICATIONS:

1977 Flood, Rural MH Services. Field Reports #54, 54a, 54b. Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Flood - River
EVENT: Southeastern West Virginia Floods
DATE: April 7, 1977
LOCATION: Southeastern West Virginia, USA

DESCRIPTION:

The Southeastern West Virginia floods killed 19 people and left hundreds homeless with property damages estimated in the millions. Few injuries were attributable to the flood due to a slow rise of water. Parts of West Virginia were officially declared disaster areas and received \$12 million in federal funding.

REPORTS AND PUBLICATIONS:

1977 : Floods, Southeastern West Virginia. Field Report #55. Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Flood - River
EVENT: Virginia Floods
DATE: April 9, 1977
LOCATION: Southwestern Virginia, USA

DESCRIPTION:

Heavy rains caused widespread, severe flooding in several Southeastern Kentucky and Southwestern Virginia communities. Southwestern portions of Virginia were severely damaged with 1,300 residences and 1,010 businesses destroyed. No deaths resulted from flooding in Southwestern Virginia, however 4,274 families were evacuated as a precautionary measure. Parts of Virginia were officially declared disaster areas and received \$7 million in federal funding.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1977

AGENT: Flood - Dam
EVENT: Johnstown Flood
DATE: July 20, 1977
LOCATION: Johnstown, Pennsylvania, USA
DESCRIPTION:

The Laurel Run Dam, northwest of Johnstown, received 12 inches of rain and gave way as a result of the pressure, killing 73 people. Fifty thousand people were evacuated as a precautionary measure. Property damages were estimated at \$200 million with 412 homes and 276 businesses destroyed. Parts of Pennsylvania were officially declared disaster areas; estimated federal funding to be received was \$112,596,533.

REPORTS AND PUBLICATIONS:

1977 Flood, Johnstown. Field Reports 59, 59a, 59b, and 59c.
Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Flood - Flash
EVENT: Kansas City Flash Floods
DATE: September 12, 1977
LOCATION: Kansas City, Missouri, USA

DESCRIPTION:

In Kansas City, sudden onset of flood waters caused 25 deaths and \$62 million in property damages. Approximately 12 inches of rain fell within a two-day period, causing Brush Creek to become a wall of water estimated at times to be 22 feet high. This and other overflowing tributaries resulted in the evacuation of 2,600 people.

REPORTS AND PUBLICATIONS:

1977 Flash Floods, Kansas City, Missouri. Field Report #60.
Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Flood - Dam
EVENT: Toccoa Dam Break
DATE: November 6, 1977
LOCATION: Toccoa, Georgia, USA

DESCRIPTION:

The Kelly Barnes Reservoir dam was at overflow stage after three days of rain. The dam eroded and gave way. Eighty acres of water descended on the college community below, killing 38 people and causing an estimated \$2.5 million in property damages.

REPORTS AND PUBLICATIONS:

1977 Dam Break, Toccoa, Georgia. Field Reports #63 and 63a.
Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Flood - River

EVENT: Four River Floods

DATE: 1977-1978

LOCATION: Two unidentified communities in the Midwest, one in the Northwest and one in the West, USA

DESCRIPTION:

Four small communities underwent flooding of at least moderate magnitude. Only one person was killed, but in the most affected locality, 700 households evacuated.

REPORTS AND PUBLICATIONS:

Perry, Ronald, Michael K. Lindell, and Marjorie Greene
1981 Evacuation Planning in Emergency Management. Lexington,
Massachusetts: Lexington Books. 199 pp.

AGENT: Flood - River

EVENT: Grand Forks Flood

DATE: April 11, 1978

LOCATION: Grand Forks, North Dakota and East Grand Forks, Minnesota, USA

DESCRIPTION:

Rural areas surrounding the Grand Forks region were impacted heavily when the Red River overflowed its banks. The two cities and bordering rural areas were declared Federal Disasters. The estimated damage toll was \$11 million.

REPORTS AND PUBLICATIONS:

Drabek, Thomas E.

1979 The Flood Breakers: Citizens Band Radio Use During the 1978 Flood in the Grand Forks Region. Boulder, Colorado: Institute of Behavioral Science, University of Colorado. 119 pp.

AGENT: Flood - Flash
EVENT: Flash Flood, Bandera County
DATE: August 1, 1978
LOCATION: San Antonio, Texas, USA

DESCRIPTION:

In one twelve-hour period, more than twenty-one inches of rain fell, swelling the Medina River basin in Bandera County. A muddy, 50 foot wall of water rampaged through the countryside, uprooting trees and destroying houses. Fourteen lives were lost, 15 million dollars in property was lost, including 200 houses.

REPORTS AND PUBLICATIONS:

Kilijanik, Thomas S.

1980 The Emergence of Interorganizational Communication Network Following Natural Disasters. Denver, Colorado: Department of Sociology, The University of Denver. 236 pp.

AGENT: Flood - Other
EVENT: Terrace Floods
DATE: October-November 1978
LOCATION: Terrace, British Columbia, Canada

DESCRIPTION:

Unseasonal warm weather, high winds and excessive rainfall resulted in floods which killed two, isolated a number of communities, and did much economic damage.

REPORTS AND PUBLICATIONS:

Scanlon, Joseph

D-HURRICANE, TYPHOON, AND SEVERE STORM

AGENT: Typhoon

EVENT: Typhoons in the Pacific

DATE: November 2 and 10, 1947

LOCATION: Yap, Western Caroline Islands

DESCRIPTION:

Two typhoons struck Yap about a week apart. No one was killed and only a few were injured, but housing damage was considerable.

REPORTS AND PUBLICATIONS:

Schneider, David M.

1957 Typhoons on Yap. Human Organization 16: 10-15.

AGENT: Typhoon

EVENT: Typhoon in the Pacific

DATE: December 23, 1947

LOCATION: Yap, Western Caroline Islands

DESCRIPTION:

About 40 days after two typhoons struck Yap, it was struck again but with minimum casualties.

REPORTS AND PUBLICATIONS:

Schneider, David M.

1957 Typhoons on Yap. Human Organization 16: 10-15.

AGENT: Typhoon

EVENT: Typhoon in the Pacific

DATE: January 13, 1948

LOCATION: Yap, Western Caroline Islands

DESCRIPTION:

This was the last of a series of four typhoons which hit Yap in about a two month period.

REPORTS AND PUBLICATIONS:

Schneider, David M.

1957 Typhoons on Yap. Human Organization 16: 10-15.

AGENT: Severe Storm

EVENT: Heavy Rains Resulting in Landslides

DATE: June 13, 1950

LOCATION: Darjeeling, India

DESCRIPTION:

Landslides were set off by 32 inches of rain over a three day period. About 150 people were killed in the district, 30 in the town itself. Over 100 were injured, and 2,000 were rendered homeless. About 200 houses were damaged.

REPORTS AND PUBLICATIONS:

Sinha, D.

1952 Behavior in a catastrophic situation: A psychology study of reports and rumours. British Journal of Psychology 43: 200-209.

AGENT: Hurricane

EVENT: Polynesian Hurricane

DATE: January 26, 1952

LOCATION: Tikopia, Solomon Islands, Polynesia

DESCRIPTION:

This hurricane resulted in no fatalities, but was very destructive economically. The hurricane destroyed essential coconut and breadfruit crops which led to famine and political unrest on the island.

REPORTS AND PUBLICATIONS:

Spillius, James

AGENT: Hurricane

EVENT: Hurricane Barbara Threat

DATE: August 14, 1953

LOCATION: Ocean City, Maryland, USA

DESCRIPTION:

The threatening forces of hurricane Barbara led to the evacuation of Ocean City residents. No casualties occurred as a result of the hurricane.

REPORTS AND PUBLICATIONS:

Rayner, Jeannette F.

1953 Hurricane Barbara: A Study of the Evacuation of Ocean City, Maryland, August 1953. Washington, D. C.: National Academy of Sciences. 17 pp.

AGENT: Hurricane

EVENT: Hurricane Florence Threat

DATE: September 25, 1953

LOCATION: Panama City, Florida, USA

DESCRIPTION:

Hurricane Florence threatened Panama City and resulted in the evacuation of 10,000 people. Damages to the city, however, were minimal.

REPORTS AND PUBLICATIONS:

Killian, Lewis M.

1954 Evacuation of Panama City Before "Hurricane Florence." Washington, D. C.: Committee on Disaster Studies, National Academy of Sciences. 14 pp.

AGENT: Hurricane
EVENT: Hurricane Carol
DATE: August 31, 1954
LOCATION: Portsmouth, New Hampshire, USA

DESCRIPTION:

Hurricane Carol lashed the coasts of Middle Atlantic and New England states on August 31 and dissipated its force in Quebec. Winds ranged up to 100 miles per hour. The storm killed 43 people in New England. Parts of the New England states were officially declared disaster areas and received \$6.5 million in federal funding.

REPORTS AND PUBLICATIONS:

Prell, Arthur Ely

1955 Successive hurricanes and cultural defenses in a New England city. Unpublished paper. 15 pp.

AGENT: Severe Storm

EVENT: Northwestern Storm

DATE: October 12, 1962

LOCATION: Portland, Oregon, USA

DESCRIPTION:

Gale force winds and rains struck the Pacific Coast area, killing 46 people in Portland and injuring many others. Property damages for all of Oregon were estimated at \$170 million. The storm did not warrant official declaration of disaster.

REPORTS AND PUBLICATIONS:

Crawshaw, Ralph

1963 Reactions to a disaster. Archives of General Psychiatry 9: 157-162.

AGENT: Hurricane

EVENT: Hurricane Cindy

DATE: September 16, 1963

LOCATION: Jefferson and Orange Counties, Texas, USA

DESCRIPTION:

Hurricane Cindy struck Texas, resulting in heavy property damage but no casualties. Jefferson and Orange Counties received 15 inches of rainfall with property damages estimated at \$10 million. Approximately 700 people were evacuated and some 4,000 persons were left homeless.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1963

AGENT: Hurricane
EVENT: Hurricane Cleo
DATE: August 27, 1964
LOCATION: Miami, Florida, USA

DESCRIPTION:

Several states were affected by Hurricane Cleo, with Florida suffering the heaviest losses; there were three deaths and 1,018 injuries. Property damage was estimated at over \$100 million. Miami particularly suffered extensive damage, with some 2,000 buildings destroyed or damaged. Cleo was the first hurricane to hit the area since 1950. Florida was the only state granted federal aid and received \$2.3 million.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1964

AGENT: Hurricane
EVENT: Hurricane Dora
DATE: September 10, 1964
LOCATION: Jacksonville, Florida, USA

DESCRIPTION:

Hurricane Dora affected Northeastern Florida and Southern Georgia, destroying or damaging 11,354 homes and buildings and killing five people. In Florida alone, two people were killed and 1,489 were injured by the hurricane. For the first time on record, inland areas, normally subjected to minimal hurricane damages, felt the full force of Hurricane Dora's winds. Property damage for the state was estimated at \$200 million. Parts of Florida and Georgia received \$8.2 million and Georgia received \$2 million in federal funding.

REPORTS AND PUBLICATIONS:

1964 Hurricane Dora. Research Memo #12. Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Hurricane
EVENT: Hurricane Hilda, Subsequent Tornadoes
DATE: October 3, 1964
LOCATION: New Orleans, Louisiana, USA

DESCRIPTION:

Several tornadoes spawned by Hurricane Hilda killed 39 people and injured 391 in Louisiana. Coastal areas suffered the heaviest losses, with property damage estimated at \$75 million. The extent of destruction entailed: 137 homes destroyed; 19,331 homes damaged; and 248 small businesses destroyed or damaged. Parts of the state of Louisiana were officially declared disaster areas and received \$2.65 million in federal funding.

REPORTS AND PUBLICATIONS:

1964 Hurricane Hilda. Research Memo #15. Columbus, Ohio: The Disaster Research Center, The Ohio State University.

AGENT: Hurricane
EVENT: Hurricane Betsy, Subsequent Floods
DATE: September 10, 1965
LOCATION: New Orleans, Louisiana, USA

DESCRIPTION:

Hurricane Betsy and subsequent rains and floods killed 67 persons, injured 860, and caused \$1 billion in property damages throughout the Gulf State area (Florida, Alabama, Louisiana, and Mississippi). In New Orleans, 17 persons were killed, 550 injured and property damages were estimated at \$100 million. The storm damaged or destroyed 18,000 homes. Parts of Louisiana were officially declared disaster areas and received \$38.5 million in federal funding. In Miami, seven people were killed and property damage was \$139 million. Parts of Florida were officially declared disaster areas and received \$1 million dollars in federal funding.

AGENT: Hurricane
EVENT: Hurricane Beulah
DATE: September 21, 1967
LOCATION: Southern Texas, USA

DESCRIPTION:

In Southern Texas, Hurricane Beulah caused major flooding and spawned 155 tornadoes, killing 15 people and injuring several. Destruction was extensive, affecting 23 counties. Property damage was estimated at \$500 million. Parts of the state of Texas were officially declared disaster areas and received \$10 million in federal funding.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1967

AGENT: Hurricane

EVENT: Hurricane Camille

DATE: August 17, 1969

LOCATION: New Orleans, Louisiana, USA

DESCRIPTION:

Hurricane Camille killed 216 people in Mississippi and Southeast Louisiana, causing an estimated \$1 billion in property losses. In New Orleans, Camille destroyed 5,238 homes and damaged 11,667 others. Transportation facilities such as highways, bridges, railways, and waterways were severely damaged. Crops and timberland were destroyed and livestock losses were great. Approximately 5,000 cattle drowned. Parts of Louisiana were officially declared disaster areas and the state received \$15 million in federal funding.

AGENT: Hurricane
EVENT: Hurricane Eloise
DATE: September 23, 1975
LOCATION: Panama City, Fort Walton Beach, Florida, USA

DESCRIPTION:

Thousands were evacuated when Hurricane Eloise struck the Florida Pan-handle, severely damaging a 55 mile strip between Fort Walton Beach and Panama City. More than 500 businesses were destroyed or damaged with property damage estimated at \$200 million. The maximum sustained wind speed was 125 m.p.h. with storm tides and waves as high as 18 feet. Ninety injuries were reported and four deaths were indirectly attributed to the hurricane. Official declaration of disaster resulted in federal funding of over \$5 million.

The Disaster Research Center, 1976

AGENT: Severe Storm

EVENT: Port Alice Landslide from Heavy Rains

DATE: November 12, 1975

LOCATION: Port Alice, British Columbia, Canada

DESCRIPTION:

Heavy rains in November resulted in tons of mud and water to accumulate on a mountainside near the town of Port Alice. Several mudslides resulted, however, no casualties were reported.

REPORTS AND PUBLICATIONS:

Scanlon, Joseph, Jim Jefferson, and Debbie Sproat
1976 The Port Alice slide. Field Report 76/1. Ottawa, Canada:
Emergency Planning Canada. 63 pp.

Ekistics: 27-31.

AGENT: Hurricane
EVENT: Hurricane Anita
DATE: September, 1977
LOCATION: South Texas coast, USA

DESCRIPTION:

Hurricane Anita threatened but did not hit most of the lower Texas coast before going into Mexico. A hurricane watch led to evacuation in a number of Texas communities.

REPORTS AND PUBLICATIONS:

Davenport, Sally S.

1978 Human Response to Hurricanes in Texas--Two Studies. Boulder, Colorado: Institute of Behavioral Science, University of Colorado. 43 pp.

AGENT: Hurricane

EVENT: Hurricane David

DATE: September 4, 1979

LOCATION: Eastern Florida, USA

DESCRIPTION:

Hurricane David hit the eastern coast of Florida after going through the Caribbean. Thousands were evacuated but there were few casualties, although it had killed hundreds further south.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1979

AGENT: Hurricane

EVENT: Hurricane Allen

DATE: August, 1980

LOCATION: South Texas, USA and Jamaica and St. Lucia

DESCRIPTION:

The hurricane cut through the Caribbean doing extensive damage. It did little damage in the United States, but nearly a half million people may have evacuated.

REPORTS AND PUBLICATIONS:

Oliver, J. and D. H. Trollope

1981 Hurricane Allen: A Post-Impact Survey of a Major Tropical Storm. Disaster Investigation Report #3. Townsville, Australia: Center for Disaster Studies, James Cook University. 63 pp.

E-POWER SYSTEM MALFUNCTION

AGENT: Power System Malfunction
EVENT: Atomic Laboratory Explosion
DATE: July 2, 1956
LOCATION: Bayside, New York, USA

DESCRIPTION:

An explosion destroyed parts of the metallurgy atomic research center of the Sylvania Electric Products Company in Bayside, (Queens) New York. One person was killed and three were seriously injured. Property damage was estimated at \$125,000.

REPORTS AND PUBLICATIONS:

Eisenbud, Merrill

AGENT: Power System Malfunction

EVENT: Atomic Plant Explosion

DATE: November 13, 1963

LOCATION: San Antonio, Texas, USA

DESCRIPTION:

When an explosion occurred in an atomic plant near San Antonio, three injuries and no fatalities were reported. Damage to the town was minimal. However, many windows were shattered. A cloud appearing to have "fallout" potential caused some alarm, but it gradually dissipated and drifted from San Antonio.

REPORTS AND PUBLICATIONS:

Haas, J. Eugene

1964 Organizational response to an explosion at Medina AEC base, San Antonio, Texas, November 13, 1963. Research Note #1. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 8 pp.

AGENT: Power System Malfunction
EVENT: Northeastern Power Blackout
DATE: November 9, 1965
LOCATION: New York, New York, USA

DESCRIPTION:

A power failure in Northeastern parts of the U.S. and Southeastern parts of Canada affected 30 million people living in a geographical area of 80 thousand square miles. The time span of the power failure ranged from a few minutes to 13½ hours. The power failure had minimal direct effect in relation to casualties and property damage.

F-SNOWSTORM AND BLIZZARD

AGENT: Snowstorm and Blizzard
EVENT: Blizzards in Colorado
DATE: February and April 1957
LOCATION: Sedalia and Trickston, Colorado, USA
DESCRIPTION:

Several blizzards resulted in people being isolated but no casualties.

REPORTS AND PUBLICATIONS:

Mischel, W.

1957 Isolation Study. Washington, D. C.: Committee on Disaster Studies, National Academy of Sciences. 15 pp.

AGENT: Snowstorm and Blizzard
EVENT: Northeastern Snowstorm
DATE: March 19-21, 1958
LOCATION: Morgantown, Pennsylvania, USA

DESCRIPTION:

In Morgantown, heavy snows caused approximately 800 motorists to be stranded in a turnpike restaurant for about 36 hours. One person died of a heart attack.

REPORTS AND PUBLICATIONS:

Fritz, C. E., Jeannette F. Rayner, and S. L. Guskin
1958 Behavior in an Emergency Shelter: A Field Study of 800
Persons Stranded in a Highway Restaurant. Washington, D. C.:
Disaster Research Group, National Academy of Sciences. 37 pp.

AGENT: Snowstorm and Blizzard

EVENT: Great Snowstorm

DATE: January 26-27, 1967

LOCATION: Chicago, Illinois, USA

DESCRIPTION:

In Chicago, 23 inches of snow fell in a 29 hour period, disrupting the daily routine of millions. There were no injuries or fatalities directly related to the snowstorm. The blizzard did not warrant official declaration of disaster.

REPORTS AND PUBLICATIONS:

Brouillette, John and James Ross

1967 Organizational Response to the Great Chicago Snowstorm of 1967. Research Note #14. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 31 pp.

AGENT: Snowstorm and Blizzard

EVENT: Kennedy Airport Snow-In

DATE: February 10, 1969

LOCATION: Kennedy International Airport, New York, USA

DESCRIPTION:

In New York, a snowstorm stranded 6,000 people in the Kennedy International Airport for several days.

REPORTS AND PUBLICATIONS:

Hammerschlag, Carl A. and Boris M. Astrachan

1971 The Kennedy Airport snow-in: an inquiry into intergroup phenomena.
Psychiatry 34: 301-308.

AGENT: Snowstorm and Blizzard
EVENT: Blizzard in Southeastern Canada
DATE: January 26-27, 1971
LOCATION: London, Ontario, Canada

DESCRIPTION:

The Southeastern Canadian blizzard involved snow accumulation of 24 inches with drifts up to 12 feet. Wind gusts of 100 miles per hour and temperatures of 15 degrees below zero fahrenheit were recorded. The blizzard casued one death and resulted in few injuries.

REPORTS AND PUBLICATIONS:

Singer, Benjamin D. and Lyndsay Green
1972 The Social Functions of Radio in a Community Emergency. Toronto,
Canada: The Copp Clark Publishing Company. 49 pp.

AGENT: Snowstorm and Blizzard
EVENT: Heavy Snows in South Carolina
DATE: February 10-12, 1973
LOCATION: Columbia, South Carolina, USA

DESCRIPTION:

In South Carolina, heavy snow fell for several days, stranding motorists and isolating small villages around the state. In Columbia, over 16 inches of snow fell over a two day period, affecting transportation in and around the city. No casualties occurred, and property damage was minimal. Official declaration of disaster was not warranted.

REPORTS AND PUBLICATIONS:

Ponting, J. Rick and E. L. Quarantelli
1973 Some Observations on Organizational Response to the Snowstorm in Columbia, South Carolina, February 9, 1973. Working Paper #49. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 7 pp.

AGENT: Snowstorm and Blizzard

EVENT: Heavy Snows in Iowa

DATE: April 9-11, 1973

LOCATION: Des Moines, Iowa, USA

DESCRIPTION:

Heavy snows in Des Moines halted activity and caused a general paralysis of all transportation for two days. Thirteen inches of snowfall and 50 mile per hour winds resulted in eight to twenty foot snow drifts, however, there were no fatalities. Official declaration of disaster was not warranted.

REPORTS AND PUBLICATIONS:

Smith, Martin and John Bardo

1973 Some Observations on Organizational Response to the Snowstorm in Des Moines, Iowa, April 9, 1973. Working Paper #51. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 7 pp.

AGENT: Snowstorm and Blizzard
EVENT: St. John's Blizzard
DATE: March 11, 1974
LOCATION: St. John's, Newfoundland, Canada

DESCRIPTION:

The St. John's blizzard resulted in 20.5 inches of snow and wind gusts of 60-70 miles per hour. However, the original weather forecast called for five to eight inches of snow and strong winds. There were no casualties, but streets and highways were blocked, immobilizing the area.

REPORTS AND PUBLICATIONS:

Scanlon, T. Joseph
1974 The St. John's/Wyatt Study: An Emergency in Newfoundland.
Report #3. Ottawa, Canada: School of Journalism, Carlton
University. 14 pp.

Canada: National Emergency Planning Establishment. 8 pp.

AGENT: Snowstorm and Blizzard
EVENT: Toowoomba Hailstorm
DATE: January 10, 1976
LOCATION: Toowoomba, Queensland, Australia

DESCRIPTION:

A hailstorm hit Toowoomba, Australia without warning, injuring 200 people but killed no one. Thousands of windows were smashed during the 15 minute storm and approximately 5,500 dwellings were damaged. Property damages were estimated at \$25 million.

REPORTS AND PUBLICATIONS:

Leivesley, Sally

1977 Toowoomba: the role of an Australian disaster unit.
Disasters 1: 315-322.

Leivesley, Sally

1977 Toowoomba: victims and helpers in an Australian hailstorm disaster. Disasters 1: 205-216.

AGENT: Snowstorm and Blizzard
EVENT: Bowling Green Snowstorm
DATE: December 1976
LOCATION: Bowling Green, Ohio, USA

DESCRIPTION:

The winter of 1976-1977 was the most severe winter in the Bowling Green, Ohio, area in over 200 years. Common occurrences were: loss of home heating and energy sources, loss of communication, loss of income, individuals living stranded, or combinations of these problems.

REPORTS AND PUBLICATIONS:

Neal, David Miller

1978 The Importance of Family, Friends, and Propinquity in Time of Disaster: A Study of the Response to the Winter of 1976-1977. Unpublished Master's Thesis (Sociology) Bowling Green State University. 74 pp.

1982 Getting ready for blizzards: Preparation levels in the Winter of 1977-1978. Sociological Focus, 15: 67-76.

AGENT: Snowstorm and Blizzard
EVENT: Watertown Snowstorm
DATE: January 28-February 1, 1977
LOCATION: Watertown, New York, USA

DESCRIPTION:

No deaths occurred as a result of the New York snowstorm which began on January 28 and lasted until February 1. In Watertown, roads were blocked by 12 foot drifts, a result of 68 inches of snow fall in that area. The town was immobilized and travel was prohibited for one week. Many persons were stranded or isolated for approximately two weeks. Parts of New York were officially declared disaster areas and received \$34 million in federal funding.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1977

AGENT: Snowstorm and Blizzard
EVENT: Niagara Blizzard
DATE: January 28-February 4, 1977
LOCATION: Niagara Region, Ontario, Canada

DESCRIPTION:

No casualties occurred when a blizzard struck the Niagara region of Ontario, however, many persons were stranded on highways and in their homes. The combination of snow and strong winds blocked roads for eight days. Industrial and agricultural losses resulted.

REPORTS AND PUBLICATIONS:

Scanlon, Joseph and Brian Taylor
1977 Two Tales of a Snowstorm: How the Blizzard of January 1977 Affected the Niagara Region of Ontario. Ottawa, Canada: Emergency Communications Research Unit, School of Journalism, Carleton University. 45 pp.

AGENT: Snowstorm and Blizzard
EVENT: Buffalo Blizzard
DATE: January 28-February 14, 1977
LOCATION: Buffalo, New York, USA

DESCRIPTION:

The blizzard struck on January 28 and lasted for 17 days, immobilizing the city. Many were stranded in their cars, causing 28 deaths. Buffalo received 153 inches of snow for the winter period; the city normally receives an average of 44 inches. Parts of New York were officially declared disaster areas and received \$34 million in federal funding.

AGENT: Tornado

EVENT: Belmond, Iowa Tornado

DATE: October 14, 1966

LOCATION: Belmond, Iowa, USA

DESCRIPTION:

The Belmond tornado killed 6 people and injured 150-200 others. Property damage was estimated at \$7.5 million with 76 businesses and 119 homes destroyed and 468 homes damaged. Official declaration of disaster was not warranted.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1966

AGENT: Tornado
EVENT: Oak Lawn Tornado
DATE: April 21, 1967
LOCATION: Oak Lawn, Chicago, Illinois, USA

DESCRIPTION:

In Oak Lawn, 55 people were killed and 964 were injured when a tornado severely damaged the Chicago suburb. Northern Illinois also felt the impact of the tornado with 383 homes destroyed and 371 damaged. Parts of Illinois were officially declared disaster areas and received \$1 million in federal funding.

AGENT: Tornado
EVENT: Kettering Tornado
DATE: May 8, 1969
LOCATION: Kettering, Ohio, USA

DESCRIPTION:

The Kettering tornado destroyed 13 homes and severely damaged 163, leaving 300 people homeless. There were no casualties, but 25 people were injured. Property damage was estimated at \$734,600. Official declaration of disaster was not warranted.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Tornado
EVENT: Salina Tornado
DATE: June 22, 1969
LOCATION: Salina, Kansas, USA

DESCRIPTION:

No one was killed, but 83 people were injured and 26 houses and 17 buildings were destroyed. Property damage amounted to \$8 million. Official declaration of disaster resulted in federal funding of \$900,000.

REPORTS AND PUBLICATIONS:

Parr, Arnold

AGENT: Tornado/Storms

EVENT: July 4 Northern Ohio Tornadoes

DATE: July 4, 1969

LOCATION: Northern Ohio, USA

DESCRIPTION:

Tornadoes, storms, and subsequent flooding drove thousands from their homes and killed 39 people. Property damage amounted to \$30 million. Official declaration of disaster resulted in federal funding of \$6 million.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Tornado

EVENT: Cincinnati Tornado

DATE: August 9, 1969

LOCATION: Cincinnati, Ohio, USA

DESCRIPTION:

The Cincinnati tornado killed four people and injured 264. The tornado left 1,000 homeless with property losses estimated at \$15 million. The tornado did not warrant official declaration of disaster.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1969

AGENT: Tornado

EVENT: Texas Tornado

DATE: May 11, 1970

LOCATION: Lubbock, Texas, USA

DESCRIPTION:

On the night of May 11, 1970 tornadoes occurred in Wisconsin, Iowa, Kansas, Ohio, and Texas. The most massive tornado formed over Lubbock, Texas. The Lubbock tornado killed 26 people and injured 2,000. The tornado devastated the community along an 8½-mile path, causing \$135 million in property damage. More than 10,000 buildings were damaged or destroyed by the tornado. Parts of Texas were officially declared disaster areas and the state received \$6 million in federal funding.

AGENT: Tornado

EVENT: Cincinnati Tornado

DATE: April 4, 1974

LOCATION: Cincinnati, Ohio, USA

DESCRIPTION:

The tornado which struck a new Cincinnati subdivision killed five persons and injured 207 others. Property damage was confined to the immediate area of the subdivision. There was an official declaration of disaster.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1974

AGENT: Tornado
EVENT: Brandenburg Tornado
DATE: April 5, 1974
LOCATION: Brandenburg, Kentucky, USA

DESCRIPTION:

The tornado killed 71 people in Kentucky, 32 of whom were residents of Brandenburg, which was almost totally destroyed. 150 were injured in the town of 1,700. Property damages in Brandenburg were estimated at \$7 million. Parts of Kentucky were officially declared disaster areas and received \$14 million in federal funding.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1974

AGENT: Tornado

EVENT: Windsor, Ontario Tornado

DATE: April 6, 1974

LOCATION: Windsor, Ontario, Canada

DESCRIPTION:

The Windsor tornado was part of a massive tornado swarm that existed in the area on the fifth and sixth of April. The tornado killed eight people and injured several. A curling rink was completely destroyed and a shopping mall suffered heavy damages.

REPORTS AND PUBLICATIONS:

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Toxicological Incident
EVENT: Phosphorous Fumes and Fire
DATE: March 22, 1979
LOCATION: Gettysburg, Pennsylvania, USA

DESCRIPTION:

A tractor-trailer carrying a mixture of red and yellow phosphorous erupted into flames. The cause of the explosion was believed to be the result of a brake dysfunction which precipitated a fire around the rear tandem wheels of the trailer. Secondary explosions and toxic fumes forced the evacuation of all residents within a two-block radius of the site.

REPORTS AND PUBLICATIONS:

Gray, Jane

AGENT: Toxicological Incident
EVENT: Train Derailment and Fire
DATE: February 10, 1979
LOCATION: Ridgway, Pennsylvania, USA

DESCRIPTION:

Nine cars carrying crude oil derailed as the result of the loss of a wheel. A punctured tank car spilled crude oil through a residential district. Heat from the axle caused a combustion of the flowing oil. No deaths or injuries occurred, but property losses were significant. Approximately 100 persons evacuated the area until the fire was contained.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident
EVENT: Tank Explosion and Fire
DATE: May 30, 1978
LOCATION: Texas City, Texas, USA

DESCRIPTION:

A series of explosions severely damaged a refining company in the center of an industrial complex. Six people were killed and twenty others were injured. Two railroad tank cars containing tetraethyl lead also exploded. Approximately 10% of the refinery was destroyed. Contingent property and the inhabitants were threatened.

REPORTS AND PUBLICATIONS:

AGENT: Toxicological Incident
EVENT: Propane Tank Car Explosion
DATE: February 24, 1978
LOCATION: Waverly, Tennessee, USA

DESCRIPTION:

A derailed tank car containing liquified petroleum gas ruptured. The ensuing fire killed 16 persons, injured 43 others, and did \$1,800,000 worth of damage.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident

EVENT: Carbon Monoxide Leak

DATE: January 28, 1977

LOCATION: Opelika, Alabama, USA

DESCRIPTION:

A high concentration of carbon monoxide gas, emitted from 28-30 fork-lift trucks, resulted in the hospitalization of 29 people and treatment of 67 others. No one was seriously injured and only those in the immediate area were affected.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

Assumption and Reality. New York: Irvington Press.

AGENT: Toxicological Incident

EVENT: TCDD Release

DATE: July 10, 1976

LOCATION: Seveso, Italy

DESCRIPTION:

An explosion at a chemical factory released a cloud of vapor which contaminated the surrounding area. The vapor consisted of sodium trichlorophinate and an extremely toxic by-product, tetrachlorodibenzopara-dioxin (TCDD). Thirty people were hospitalized for symptoms of burns and poisoning; 730 individuals were evacuated from the area most severely contaminated.

REPORTS AND PUBLICATIONS:

AGENT: Toxicological Incident
EVENT: Hydrogen Sulphide Gas Leak
DATE: October 2, 1973
LOCATION: Camrose, Alberta, Canada

DESCRIPTION:

An oil well emitted hydrogen sulphide gas and caused the evacuation of several thousand people in Camrose. The gas leak endangered nearby farmers, villagers, and a small city.

REPORTS AND PUBLICATIONS:

Ponting, J. Rick

1974 It can't happen here: a pedagogical look at community coordination in response to a toxic gas leak. Emergency Planning Digest 1: 8-13.

AGENT: Toxicological Incident
EVENT: Chlorine Leak Threat
DATE: April 1, 1972
LOCATION: Louisville, Kentucky, USA

DESCRIPTION:

The possibility of a chlorine gas leak prompted the evacuation of 4,000 persons along the Ohio River Valley near Louisville. The source of the threat was a runaway barge containing 640 tons of liquid chlorine that had wedged itself against a dam on the river. The barge was stabilized and residents returned to their homes; no one was injured.

Observations on Community Coordination. Working Paper #44.
Columbus, Ohio: The Disaster Research Center, The Ohio State
University. 12 pp.

AGENT: Toxicological Incident
EVENT: Ammonia Vapor Exposure
DATE: August 1, 1961
LOCATION: Peoria Suburbs, Illinois, USA

DESCRIPTION:

A cloud of anhydrous ammonia spread over Peoria, affecting 40 persons but killing no one. As a precautionary measure, 13,000 people were forced to evacuate. The leak was a result of a ruptured pipe used to discharge the substance from a barge.

REPORTS AND PUBLICATIONS:

Albert, Michael B. and Louis Segaloff

1962 Task Silence: The Post-midnight Alarm and Evacuation of Four Communities Affected by an Ammonia Gas Release. Philadelphia, Pennsylvania: Institute for Cooperative Research. 37 pp.

AGENT: Toxicological Incident

EVENT: Toxic Gas

DATE: August 12, 1960

LOCATION: "Bayview" (small Southern town)

DESCRIPTION:

No one was killed but 64 persons were affected when an unknown toxic gas drifted into the town of about 5,000 people probably from one of the chemical plants in the area.

REPORTS AND PUBLICATIONS:

Hesbacher, P. T. and Louis Segaloff
1961 The Bayview Gas Scare (Task Stagger). Philadelphia, Pennsylvania:
Institute for Cooperative Research, University of Pennsylvania.
26 pp.

AGENT: Toxicological Incident
EVENT: Chlorine Gas Leak
DATE: July 23, 1953
LOCATION: Edgewood, Maryland, USA

DESCRIPTION:

No one was killed or seriously injured when chlorine gas leaked from a vent line at the Diamond Alkali Plant. Gas concentration, however, forced most area residents to evacuate. The plant was located on the Edgewood Post of the Army Chemical Corps.

REPORTS AND PUBLICATIONS:

Rayner, Jeannette

1953 Edgewood gas episode, July 28, 1953--preliminary narrative.
Unpublished preliminary report. Baltimore, Maryland:
Disaster Study Project, University of Maryland. 14 pp.

AGENT: Toxicological Incident

EVENT: Carbon Monoxide Asphyxiation Incident

DATE: December 8, 1952

LOCATION: Chicago, Illinois, USA

DESCRIPTION:

A carbon monoxide gas leak in the wholesale and industrial area near Chicago's Loop resulted in medical treatment for 30 persons affected by the fumes. No fatalities resulted.

REPORTS AND PUBLICATIONS:

National Opinion Research Center

1953 Report on a carbon monoxide asphyxiation incident, ABC Manufacturing Company, Chicago, Illinois, December 8, 1952. Chicago, Illinois: National Opinion Research Center.

AGENT: Toxicological Incident
EVENT: Methyl Alcohol Poisoning
DATE: October 21-28, 1951
LOCATION: Atlanta, Georgia, USA

DESCRIPTION:

This incident of methyl alcohol poisoning killed 39 people, blinded 9 others and resulted in the hospitalization of over 200 others.

REPORTS AND PUBLICATIONS:

Bennett, Ivan

1951 A brief account of observations made during an outbreak of methyl alcohol poisoning. Unpublished paper. 13 pp.

AGENT: Tornado

EVENT: Cheyenne Tornado

DATE: July 16, 1979

LOCATION: Cheyenne, Wyoming, USA

DESCRIPTION:

The northern edge of Cheyenne was struck by a moderately destructive tornado which destroyed or badly damaged over 400 homes. Approximately 48 persons were seriously injured; one child died as a result of the event.

REPORTS AND PUBLICATIONS:

Drabek, Thomas E.

1980 Taming the Frontierland Tornado: The Emergent Multiorganizational Search and Rescue Network in Cheyenne, Wyoming, July, 1979. Denver, Colorado: Department of Sociology, The University of Denver. 115 pp.

AGENT: Tornado
EVENT: Wichita Falls Tornado
DATE: April 10, 1979
LOCATION: Wichita Falls, Texas, USA

DESCRIPTION:

The Wichita Falls tornado was ranked at four on the Fujita scale of tornado strength, placing it among the severest 3% of all tornadoes in the United States. Forty-seven persons were killed; 171 injured required hospitalization; 1,700 injured required some kind of medical attention. More than 3,000 homes in an eleven square mile area were devastated. Wichita Falls was declared a disaster area.

REPORTS AND PUBLICATIONS:

AGENT: Tornado
EVENT: Birmingham Tornado
DATE: April 4, 1977
LOCATION: Birmingham, Alabama, USA

DESCRIPTION:

The Birmingham tornado killed 24 people and injured 260-270 others. The tornado cut a path approximately 12 miles long and 3/4 of a mile wide, destroying 15-20 homes and damaging over 100 more. Although property damage was estimated in the millions, the area did not warrant official declaration of disaster.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Tornado
EVENT: Lemont Tornado
DATE: June 13, 1976
LOCATION: Lemont, Illinois, USA

DESCRIPTION:

The Lemont tornado killed 2 people and injured 35 when it touched down in a residential area of the town. Property damages were estimated at \$6 million with 87 homes destroyed and 82 damaged. Parts of Illinois were officially declared disaster areas and received \$1 million in federal funding.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1982 The Delivery of Emergency Medical Services in Disasters:
Assumption and Reality. New York: Irvington Press.

AGENT: Toxicological Incident

EVENT: Fertilizer Plant Fire

DATE: May 1, 1979

LOCATION: Atlanta, Ohio, USA

DESCRIPTION:

A fire which completely enveloped a fertilizer plant in flames spread to canisters of liquid fertilizer stored in the building. The canisters subsequently exploded, sending fireballs nearly 108 feet into the air. Nearly all of Atlanta's residents were forced to evacuate because of spreading smoke and toxic fumes. The company's losses were estimated at \$400,000.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident
EVENT: Chemical Explosion and Fire
DATE: May 14, 1979
LOCATION: Harvey, Louisiana, USA

DESCRIPTION:

A large tank containing ethyl alcohol ignited and exploded within a chemical manufacturing and storage facility. No serious casualties occurred as a result of the incident, yet six fire personnel were treated at the emergency room of a nearby hospital for minor eye irritation.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident
EVENT: Fertilizer Plant Fire
DATE: June 17, 1979
LOCATION: Jacksonville, Florida, USA

DESCRIPTION:

A chemical plant fire resulted in the loss of two-thirds of the plant's capacity. Buildings affected were a total loss. Forty-five persons were treated for smoke and toxic fume inhalation. Evacuation estimates range from 2,000 to 5,000 in the affected area of the city.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident
EVENT: Chemical Plant Fire
DATE: July 5, 1979
LOCATION: Memphis, Tennessee, USA

DESCRIPTION:

An explosion occurred in a chemical company which stores and manufactures herbicides and pesticides. The explosion and fire caused the release of toxicological substances into the air, forming a toxic cloud. Approximately 3,000 people were evacuated from a 1-mile area. Damage to the plant was estimated at \$2.5-3.5 million. Civilian and fire personnel injuries were primarily caused by toxic fumes.

REPORTS AND PUBLICATIONS:

Gray, Jane

1981 Three Case Studies of Organized Responses to Chemical Disasters. Miscellaneous Report #29. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 60 pp.

Quarantelli, E. L.

AGENT: Toxicological Incident
EVENT: Sulfur Fire and Toxic Cloud
DATE: August 25, 1979
LOCATION: Orchard, Texas, USA

DESCRIPTION:

No serious casualties occurred as a result of a fire at an abandoned sulfur mine. Four individuals were treated for respiratory distress. Property losses existed in the form of crop damage caused by a sulfur cloud which dissipated the following day.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident
EVENT: Propane Tank Car Derailment
DATE: September 25, 1979
LOCATION: Everett, Washington, USA

DESCRIPTION:

Nine cars of a freight train derailed near the end of the Hewitt tunnel. One car, filled with liquified propane gas overturned. There were no major injuries or destruction as a result of the incident.

REPORTS AND PUBLICATIONS:

Quarantelli, E. L.

1981 Sociobehavioral Responses to Chemical Hazards: Preparations for and Responses to Acute Chemical Emergencies at the Local Community Level. Final Project Report #28. Columbus, Ohio: The Disaster Research Center, The Ohio State University. 133 pp.

AGENT: Toxicological Incident

EVENT: Chlorine Gas Threat

DATE: November 11, 1979

LOCATION: Mississauga, Canada

DESCRIPTION:

A Canadian Pacific Railroad's train of 110 cars, 40 of which carried butane, propane, styrene, propylene, toluene, and chlorine, developed a wheel assembly problem. The wheel assembly malfunction caused a derailment of 25 cars. A series of explosions followed the derailment. The chlorine tanker was one of the derailed cars and leaked gas. Local responders evacuated 220,000 residents, 3 hospitals, and several nursing homes. Less than a dozen injuries resulted; no deaths were reported. Estimates of total damages incurred includes losses of 25 railroad cars, track, roadbed, as well as loss of income to those evacuated from the area.

1960 The campus reacts to disaster. Lycoming Alumni Bulletin 13: 8-11.

AGENT: Transportation Accident

EVENT: Airplane Crash

DATE: December 8, 1963

LOCATION: Elkton, Maryland, USA

DESCRIPTION:

A PanAm jet bound for Philadelphia crashed into a Maryland cornfield, killing 82 passengers.

REPORTS AND PUBLICATIONS:

Latane, Bibb and Ladd Wheeler

1966 Emotionality and reactions to disaster. Journal of Experimental Social Psychology Supplement 1: 95-102.

AGENT: Transportation Accident

EVENT: Wichita Plane Crash

DATE: January 16, 1965

LOCATION: Wichita, Kansas, USA

DESCRIPTION:

 An Air Force KC-135 tanker plunged into a heavily populated neighborhood in Wichita, killing 29 people and injuring many.

REPORTS AND PUBLICATIONS:

Cotter, Cornelius P.

1968 Jet Tanker Crash: Urban Response to Military Disaster.
 Lawrence, Kansas: The University Press of Kansas. 191 pp.

AGENT: Transportation Accident

EVENT: Plane Crash

DATE: November 8, 1965

LOCATION: Greater Cincinnati Airport, Kentucky, USA

DESCRIPTION:

A Boeing 727 crashed into a hill near the Greater Cincinnati Airport killing 58 persons.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1965

AGENT: Transportation Accident
EVENT: Ammunition Train Derailment
DATE: August 14, 1968
LOCATION: Urbanna, Ohio, USA

DESCRIPTION:

The possibility of explosion following the derailment of an ammunition train prompted the evacuation of 4,000 persons from their homes; however, the explosion did not occur. There were no casualties and damage was limited to the train and track.

REPORTS AND PUBLICATIONS:

The Disaster Research Center, 1968

AGENT: Transportation Accident

EVENT: Airplane Crash

DATE: October 25, 1968

LOCATION: Lebanon, New Hampshire, USA

DESCRIPTION:

A Northeast plane flight with 42 persons crashed into a mountainside killing 32 persons.

REPORTS AND PUBLICATIONS:

Vosburg, Robert L.

1975 Disaster alert and the community mental health center.
Community Mental Health Journal 7: 24-28.

1405-1409.

AGENT: Tsunami

EVENT: Crescent City Tsunami

DATE: March 27, 1964

LOCATION: Crescent City, California, USA

DESCRIPTION:

In Crescent City, 29 city blocks were affected by a tsunami that killed 11 persons and injured 24. Damage to business and harbor areas of the town was extensive, however, injuries and casualties were minimal because the wave struck after business hours. The state of California received \$1.25 million in federal funding following official declaration of disaster.

AGENT: Tsunami

EVENT: Sitka Tsunami

DATE: July 30, 1972

LOCATION: Sitka, Alaska, USA

DESCRIPTION:

No deaths or injuries resulted from the Sitka tsunami. The duration of the tremors were short but severe, with \$9,000 estimated property damages.

REPORTS AND PUBLICATIONS:

Haas, J. Eugene and Patricia B. Trainer

1973 Effectiveness of the tsunami warning system in selected coastal towns in Alaska. Paper presented at the Fifth World Conference on Earthquake Engineering, Rome, Italy, June 25-29, 1973.

K-VOLCANIC ERUPTION

AGENT: Volcanic Eruption
EVENT: Mt. Lamington Eruption
DATE: January 21, 1951
LOCATION: Mt. Lamington, New Guinea

DESCRIPTION:

A volcanic eruption killed about 4,000 and forced another 5,000 to evacuate.

REPORTS AND PUBLICATIONS:

Belshaw, C. S.

1951 Social consequences of the Mt. Lamington eruption. Oceania 21: 241-253.

AGENT: Volcanic Eruption
EVENT: Kapoho Volcano
DATE: January 13 - February 7, 1960
LOCATION: Kapoho, Hawaii, USA

DESCRIPTION:

The volcanic eruption in Kapoho completely destroyed the village, however, the 250 inhabitants had evacuated before the lava engulfed the village and did several million dollars in damages.

REPORTS AND PUBLICATIONS:

Lachman, Roy and William J. Bonk
1960 Behavior and beliefs during the recent volcanic eruption at
Kapoho, Hawaii. Science 131: 1095-1096.

eruption, evacuation, and destruction of Kapoho, Hawaii.
Unpublished manuscript.

AGENT: Volcanic Eruption

EVENT: Tristan da Cunha Volcano

DATE: October 8, 1961

LOCATION: Tristan da Cunha, South Atlantic

DESCRIPTION:

Lava flooded into the village of Tristan da Cunha, a British island, and forced 260 islanders to evacuate. Only one home was damaged; however, fields were buried and the fishing industry, one factory, and two docks were destroyed.

REPORTS AND PUBLICATIONS:

Much, Peter A.

1971 Crisis in Utopia: The Ordeal of Tristan da Cunha. New York:
Thomas Y. Crowell. 324 pp.

AGENT: Volcanic Eruption
EVENT: Taal Volcano
DATE: September 28, 1965
LOCATION: Tagaytay, Batangas, Philippines

DESCRIPTION:

The eruption caused 50 million meters of rocks, mud and ashes to bury and destroy several communities in Tagaytay. Many people were injured and 200-300 people were killed. Approximately 1,300 families were left homeless.

REPORTS AND PUBLICATIONS:

Carroll, John J. and Salvador A. Parco
1966 Social Organization in a Crisis Situation: The Taal Disaster.
Manila: Philippine Sociological Society. 59 pp.

AGENT: Volcanic Eruption

EVENT: Mt. Usu Eruption

DATE: August 1977

LOCATION: Hokkaido, Japan

DESCRIPTION:

In early August 1977 Mt. Usu erupted threatening small towns around it and damaged farms, orchards, and pastures on the southern and eastern sides of the mountains. While there were no casualties, thousands were evacuated, some for about a month.

REPORTS AND PUBLICATIONS:

Hirose, Hirotada

disaster. Unpublished paper.

AGENT: Volcanic Eruption

EVENT: Mt. St. Helens Eruption

DATE: May 18, lesser eruptions May 25, June 12, 1980

LOCATION: Southwest Washington, USA

DESCRIPTION:

In the first eruption, 34 were killed (plus 26 missing). Timber and summer homes were destroyed in a 150 square mile area north of the mountain. Subsequent flooding of the Cowlitz River resulting from volcanic ash destroyed major highways, bridges, and homes. The volcanic ash cloud covered much of eastern Washington and Idaho. The total losses in the state from all the eruptions approximated \$860 million. There was a federal declaration of disaster.

L-MISCELLANEOUS AND MIXED

AGENT: Miscellaneous and Mixed

EVENT: Tube Shelter Disaster

DATE: March 3, 1943

LOCATION: London, England

DESCRIPTION:

During an airraid alert, a large number of people began to arrive at a tube shelter and entered by a flight of stairs. A woman in the front line stumbled and fell; others began to fall. Within seconds, the pile of bodies was three to four feet high. 161 people were killed instantly; 12 more died in a hospital as a result of asphyxia.
